BluePlanet™ SepticMedic

High-performance biological system for septic systems

BluePlanet™ Septic Medic is a 100% biological system using beneficial, naturally occurring bacteria (BSL-1) for septic systems, pipelines and sanitary systems. Its biological action supports sludge breakdown, reduces sulfide odors, helps clear blockages caused by kitchen fats and paper residues, and promotes free drainage flow.

When used in septic and sanitary systems, BluePlanet™ Septic Medic helps:

- effectively reduce sulfide odors in tanks and pipelines
- support sludge breakdown and extend maintenance intervals
- enzymatically break down blockages caused by kitchen fats and paper residues
- promote optimum infiltration and help protect the system against backups

BluePlanet™ Septic Medic is 100% biological, safe and gentle. It works with beneficial, naturally occurring bacteria (BSL-1) and is suitable for all pipelines and sanitary systems.

Application:
Shake well before use, pour directly into the toilet and flush. Maintenance dosage: add 240–480 ml per 3.8 m³ of tank volume every 60–90 days. In case of strong odors or risk of blockage, apply 480 ml per 3.8 m³ of tank volume weekly until conditions improve.

Technical data:
Product type: 100% biological bacterial system (BSL-1)
Application area: Septic systems, pipelines and sanitary systems
Dosage: 240–480 ml per 3.8 m³ tank volume; maintenance every 60–90 days

Packaging:
946 ml
3,78 L

Safety:
Keep out of reach of children. Do not ingest. In case of eye contact, rinse with water for several minutes. Avoid contact with open wounds. In case of skin contact, wash affected areas with soap and water.
